

# Samsung Notebook SERIES 9

The most premium notebook for the most demanding executives

Samsung recommends Windows.

---

## Highlights

- Increase productivity with Windows 7 Professional operating system, powerful Intel® Core™ i5/i7 ULV processor and Intel HD Graphics.
  - Secure data with durable aluminum construction and lightweight (1.16 kg or 2.56 lb for the 13.3 in. model, 1.65 kg or 3.64 lb for the 15.0 in. model) design.
  - Improve usability with the auto-sensing backlit keyboard, multi-touch ClickPad and SuperBright anti-reflective display.
  - Project a better corporate image with a simple, elegant design.
- 

## Samsung Notebook Series 9 is powerful, strong and easy to use

Samsung Notebook Series 9 is designed to meet the rigorous demands of business and travel use. Made with an aluminum single-shell body, Samsung Notebook Series 9 can easily withstand inevitable knocks and jolts. This computer features fast startup, a long-lasting battery and a dependable solid state drive (SSD) to ensure that users can work any time. Samsung Notebook Series 9 is also elegantly designed and comfortable to use, with sharp picture quality, auto lighting control and a newly designed keyboard with bigger buttons and glass coated ClickPad.

# Impossibly thin. Impeccably crafted. Being thin has never been so big.

Samsung recommends Windows.

## Elegant craftsmanship meets impressive technological strength

Samsung Notebook Series 9 is one of the lightest and thinnest notebooks available, measuring just 14.9 mm (0.59 in.) thin at its thickest point. The sturdy exterior design features a sleek aluminum surface and a durable cover. The back lit keyboard is perfect for dimly lit environments, and the multi-touch ClickPad responds to 21 finger gestures. The SuperBright Plus widescreen display shows data clearly, with an HD+ LED backlit anti-glare screen.

A state-of-the-art Intel Core processor offers optimized power management for any task. Turbo Boost technology accelerates performance by automatically allocating CPU processing power as needed.

The SSD hard disk provides lower power consumption and improved performance. The SSD has no moving parts, so the chance of losing data is minimized. The SSD boots up in just 9.8 seconds, 60 percent faster than a hard disk drive (HDD), and thereby decreases power usage and accelerates data access.

When the notebook is in use, the lid can be closed, putting the system into a powerless sleep mode. When reopened, the system is ready for use again in just 1.4 seconds. Fast Start saves configurations to the hard drive and PC memory, so settings and applications remain the same as they were prior to sleep mode.

Samsung Notebook Series 9 delivers power efficient performance and battery life of up to 10 hours. The lithium-polymer battery and Samsung's PowerPlus charging technology make the battery lifespan last significantly longer than a conventional battery.

## Style and performance for professionals on the go.

---

### Improve usability with advanced keyboard, ClickPad and display features

Samsung Notebook Series 9 includes Samsung's SuperBright screen, with 400 nit brightness. The screen clearly reflects the true colors and details of websites and graphics, even when viewed in direct sunlight. The 15-inch version features a larger screen than other light notebooks of its size.

Ease of use is enhanced with Samsung's new multi-touch ClickPad, which features a glass coating and image sensor, meaning the cursor remains steady and in clear view all the time. This multi-touch ClickPad is located in the center of the palm rest, and features 21 types of gesture support, including pinch, swipe and rotate.

Samsung Notebook Series 9 also includes a backlit keyboard with smooth keys for an effortless experience when computing in any light. Users can comfortably work at cafes, parks, airport lounges or other locations.

### Safeguard company data with lightweight construction and sophisticated design

Samsung Notebook Series 9 is built with aluminum, to offer lightweight design with ease of mobility. Mobile employees can optimize efficiency with a notebook that is compact and easy to carry. The body is 100 percent matte-finished aluminum, and comes in a professional mineral ash black color.

### Project a professional corporate image with premium design

The slim, elegant design of Samsung Notebook Series 9 ensures that your employees leave a favorable impression within any environment. Sleek, incredibly thin and aerodynamic, this notebook identifies those who carry it as technical leaders and mechanical-style enthusiasts. Even employees who might otherwise choose to use their own devices in the office are likely to prefer the stunning design of Samsung Notebook Series 9.

Designed to go. Powered to perform.

# From Samsung, the world's largest electronics company.

Samsung recommends Windows.

## Why Samsung PC?

### A trusted brand

Through a dedication to quality, performance, technology, design and service, Samsung has risen to become one of the fastest growing PC vendors in the world. This has helped Samsung become the largest electronics company in the world.

### Better performance and better technology

Samsung PC products are continually celebrated by the world's media for outstanding performance – including “Product of the Year 2009” awards from Wired (US), Mikro PC (Finland), and PC World (China & Poland).

### Unrivalled product quality

We manufacture the vast majority of our laptop components, so we can be certain they are world class. Our vigorous quality assurance program and ISO standard manufacturing process, also ensure that only the best products make it through to the customer.

### Designed to turn heads

Through worldwide design centers and partnerships with product designers, we have created laptops with style that have won prestigious design awards such as the iF and IDEA Design awards and the Good Design 2009 “Gold Award”.

### Worry-free service

We're committed to providing the best, most timely customer service in the industry and proud to be recognized as the leader in customer service satisfaction (ranked #1 for customer satisfaction in the notebook PC category by C'T Magazine Germany in May2010).
