Curved 21:9

The curved screen puts every corner of the screen at the same distance from the customer's eyes, providing a uniform viewing experience. It also presents a more immersive experience with a wider field of view and increased perceived area of peripheral vision compared to a flat display of the same size.

UltraWide QHD (3440 x 1440) Display

The Acer XR382CQK features a UltraWide QHD (3440 x 1440) resolution, offering the sharpest picture quality and providing a perfect picture with a broader view.

In-Plane Switching

IPS (In-Plane Switching) technology, which is accurate across 178° presents a splendid quality in wide angles. On the screen, everything is crisp and clear from any angle.

Adaptive-Sync Support

Adaptive-Sync Technology

Free-Sync technology is designed to eliminate the screen tearing that often occurs when playing computer games with a monitor. Now, with Adaptive-Sync technology, your GPU can tell a monitor what its rendering rate is and the monitor can match it.
