EB-530S

3200 lm	XGA	16 W	
WiFi		HDMI	89cm → 80in
1 ᵚ			

This versatile projector is ideal for delivering high-quality presentations in classrooms and small meeting rooms

The EB-530S delivers superior-quality images and a host of additional features as standard to give users more for their money. It can be wall or ceiling mounted or placed on a table close to the wall to free-up more workspace.

High-quality image
Complete with our 3LCD technology, the EB-530S displays superior-quality, bright images with more accurate colours. The image can be seen even in brightly-lit rooms thanks to an equally high white and colour light output. Image detail is clear thanks to a high contrast ratio and our new short-throw lens means sharper images and improved focus.

More value for your money
The lamp in the EB-530S now lasts up to 10,000 hours in eco mode. Additionally, it comes with a built-in 16w speaker and a microphone input.

Easy to set up and use
The EB-530S has both horizontal and vertical keystone correction to achieve a perfectly shaped image. Multi-PC projection software allows content from four devices, including PCs, tablets and smart phones, to be displayed simultaneously.

Compatible solution
It is designed to work with SMART Board M600 and 800 series interactive whiteboards[1] supporting the SMART Extended Control Panel (ECP) - letting you control the power, volume and input options.

Collaboration is seamless with this integrated solution. When paired with a SMART Board interactive whiteboard, this system includes SMART Notebook collaborative learning software, allowing users to easily interact in real-time with on-screen content. Educators can enliven the classroom with thousands of pieces of pre-created SMART Notebook content available on the SMART Exchange.

KEY FEATURES

- **Exceptional image quality**
  Epson's 3LCD technology displays brighter images and more accurate colours

- **Equally high white and colour light output**
  Projected image can be seen clearly even in brightly-lit rooms

- **Longer lamp life means low TCO**
  10,000 hours in eco mode / 5,000 hours in normal mode

- **Flexible installation options**
  Horizontal and vertical keystone correction for off-centre and uneven placement

- **Easy operation**
  Compatible with selected SMART Board interactive whiteboards
